Course Title : Web Technologies

Lab sheet 2 Programs for Module 1

Problem Statement: You have been hired as a software developer for Eureka Info Solutions. They are already doing online shopping project for ABC Mobile shop. You are part of a development team and your task is to create a static web page using HTML.

The web page should be having following things:

- 1) Top of the page will display the Mobile shop Banner (include image and text) and other related information.
- 2) New offers and notifications are in running text.
- 3) Middel of the page will display the mobile information, clicking on mobile name/image the page will take you to the next page which will display the mobile image and specification in tabular format.
- 4) Bottom of the page will display the contact information.

HTML Tags used: <html> <head> <title> <body> <h1> <h2> <h3> <a> <marquee> <h4> <p> <center> <hr> <table> <tr> <th> <td>

Expected Output:
