<p align="center" style="color:red"><strong>Course Code : CSE2067<br>Course Title : Web Technologies<br>Lab sheet 5 Programs for Module 2</strong></p>

**Problem Statement** : Design a document using XHTML and CSS to create an Admission registration form. The web page should be having following things:

1. The first page displays instructions with a register button and applying external CSS

2. Second page to get essential student data and apply inline, internal CSS.

## Expected Output:

**Instruction.html**

**Register.html**

# Admission Registration 2022-23

## Student Registration Form
